- Seals: Dust-proof Gasket seals

Discontinued date

- 2018.06.30

Description

This PIH-305 scanner is designed to operate indoors with load weighing up to 15.41b (7kg) respectively.

Proper performance depends on secure fastening to a suitable mounting surface with the camera correctly mounted and balanced on the unit. Round-base units is installed directly on the PIH-5003 mounting bracket. Scanner mounting screws should be tightened only enough to prevent the base from moving on the mounting surface.
