Standalone RAID Storage System Network Video Recorder Specification

Features

- 16 Channel network camera Input
- Up to 3mega pixel H.264 network camera support
- Up to 1080P 60 FPS network camera support
- Network redundancy supported
- Internal HDD up to 6TB supported
- Software RAID 1/5 supported
- External e-SATA storage supported, up to 32TB
- HDMI and VGA output up to 1920×1080P
- Multi-touch screen support
- Mobile phone (iOS, Android) solutions provided

Alternative models

- NVR6104E
- NVR6208E
- NVR6216E

Description

The latest NVR network recorder series NVR2400 released by LILIN can connect to network cameras, etc., and has a built-in hard disk array storage system (RAID) solution. Data security. Ensures that all recorded data is not easily lost due to hard disk damage. In addition, multiple security mechanisms for network security (network redundancy) ensure the integrity of recorded data. The NVR2400 can input 16 network encoding devices, provide 48 Mbps network bandwidth, and support 3 million pixel resolution recording. Users can quickly find the correct historical recording image using the timeline and event search functions. NVR2400 network video recorder can support 8 pcs 6TB hard disk, two eSATA storage devices for long-term real-time recording. Supports multi-touch screen, remote control, 931D keyboard, mouse and other control interfaces. NVR2400 network video recorder supports various flexible backup methods such as USB, HTTP, FTP, network computer and so on. With LILIN NAV VMS central image management software, you can fully access NVR recording data, system records, etc. and integrate with other LILIN network devices. Smartphones (iOS, Android) can support remote video surveillance. Users do not need to connect a PC or additional software The NVR2400 can be configured in various network environments.
