- Plug-n-play one click auto installation with LILIN IPScan and WS Discovery driver
- High quality recording
- Low bandwidth remote viewing
- No PC required
- VGA and HDMI video outputs

Description

LILIN L series NVR400L multi-touch standalone Network Video Recorder is a plug-n-play and cost-effective video surveillance system for SOHO and SMB users to record and navigate their IP based security cameras. LILIN NVR L series systems support up to 6TB storage capacity. With a total of 48Mbps of bandwidth available, the L series NVRs are able to support up to 16 cameras at high definition resolution in real time as well as other configurations. The user interface is intuitive with all the features that end users need for daily

video surveillance operations – video recording, playback / live view of recorded video. Full LILIN NAV software support, Web based remote viewing, iOS, and Android support. With LILIN's unique IPScan technology, you can locate all the cameras on the network and imports a preview picture of each channel to help with identification, which greatly speeds up commissioning.
