Seeing everything in a scene – More efficiently than with multiple cameras

LILIN FR33C2 is a fixed dome IP security camera featuring a fisheye lens for 360° panoramic wide angle view without any blind spots. The fisheye lens with high resolution provides 360° wide view surveillance, and the panorama function with quad view enables 4 different angle images to display for recording and monitoring at the same time. This latest fisheye fixed dome network camera introduced by LILIN, featuring a detailed 12-Megapixel resolution CMOS sensor with superb image quality. With flexible design of FR33C2 allows it to be applied in various IP surveillance environments. LILIN FR33C2 delivers clear images via multi-streaming H.264 and Motion JPEG video up to 4000 x 3000 pixels, and also offers electronically pan, tilt, and zoom function that allows can give users access different video modes including: 180° panorama view or 360° source image view.

Dimensions: Ø 117mm x 55mm

4 cameras in 1

Multiple dewarp display modes on the same screen. It is a perfect solution to cover a large area such as entrances, exits, and lobbies

Video Security App

Available on Android and iOS – **LILIN Pro** app provides security alarm push notification, real-time live viewing, and remote video playback

ONVIF-compliant

Open Network Video Interface Forum (ONVIF) is a standard for physical IP based security products. FR33C2 camera is ONVIF Profile S conformant

Privacy Masking

Privacy Masking is a feature used to protect personal privacy by concealing private areas in the camera's field of view. Doorways and house windows for example are not subject to surveillance

SD Cards in Sync with NAV Software

FR33C2 camera with built-in Micro SD/SDHC/SDXC card slots can provide redundant video viewing and recording. You can synchronize an SD card with LILIN VMS (Video Management Software) – Navigator (NAV)

Wind and Rain Standards

Meet international IP66 standards for dust and moisture resistant allowing you to install cameras in environments subject to wind and rain

Wide Dynamic Range

Wide Dynamic Range (WDR) displays details of both the brightest and darkest areas. WDR can extend image visibility under high contrast lighting scenes and improve image quality

Day and Night Operations via Removal of the IR-cut filter

FR33C2 camera was designed using a mechanical IR cut filter for increased IR sensitivity resulting in improved night time images. The removable IR-cut filter allows day and night operations even in the low lux condition providing outstanding vision

Motion Detection

Detect motion and capture the event. Motion in the selected area will provoke an alert

Alarm Detection

Alarm Detection is designed to provide the electronic detection of intruders

Noise Reduction

Remove noise from a signal. Suppressing noise in an image in low light conditions and able to retain quality videos at the same time

Impact Resistant

IK10-certified housing designed to protect the camera from destructive behavior
